DELAWARE ORTHOPAEDIC SPECIALISTS

## **Do you have knee arthritis? Have you received a steroid injection in your knee?**

Our study examines how steroid injections improve knee pain, function, and physical activity over 3 months.

We are recruiting patients who are:

- Seeking treatment for knee osteoarthritis
- Over the age of 40

**Compensation is provided for participation!**

For more information, please contact the **ACTIVE Lab** at the University of Delaware
